

sysio::chain::pending
_block_header_state::
make_block_header

sysio::chain::apply
_context::schedule_deferred
_transaction

sysio::chain::emplace
_extension

```
graph LR; A["sysio::chain::pending_block_header_state::make_block_header"] --> C["sysio::chain::emplace_extension"]; B["sysio::chain::apply_context::schedule_deferred_transaction"] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two separate boxes. The top box contains the text 'sysio::chain::pending_block_header_state::make_block_header'. The bottom box contains the text 'sysio::chain::apply_context::schedule_deferred_transaction'. Two blue arrows originate from the right side of these boxes and point towards a single box on the right. This box contains the text 'sysio::chain::emplace_extension'.
