

testing::internal::  
UnitTestImpl::failed  
\_test\_case\_count

```
graph LR; A["testing::internal::  
UnitTestImpl::failed  
_test_case_count"] --> B["testing::internal::  
CountIf"]
```

A diagram showing a pointer relationship. On the left, a gray rectangular box contains the text 'testing::internal::', 'UnitTestImpl::failed', and '\_test\_case\_count' stacked vertically. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'testing::internal::' and 'CountIf' stacked vertically.
