

```
sysio::chain::detail  
::decompose< T, Rest...  
>::extract
```

```
graph LR; A["sysio::chain::detail  
::decompose< T, Rest...  
>::extract"] --> B["fc::raw::unpack"]; B --> B;
```

The diagram illustrates a function call. A grey rectangular box on the left contains the code `sysio::chain::detail::decompose< T, Rest...>::extract`. A blue arrow points from the right side of this box to a white rectangular box on the right. The white box contains the code `fc::raw::unpack`. Above the white box, a blue curved arrow points from its top edge back to its top edge, indicating a self-call or a loop.

```
fc::raw::unpack
```
