

sysiosystem::producer
_info::get_producer_authority

sysiosystem::system
_contract::regproducer

sysiosystem::convert
_to_block_signing_authority

```
graph LR; A["sysiosystem::producer_info::get_producer_authority"] --> C["sysiosystem::convert_to_block_signing_authority"]; B["sysiosystem::system_contract::regproducer"] --> C;
```

The diagram illustrates a mapping or conversion process. On the left, two white rectangular boxes represent source functions: 'sysiosystem::producer_info::get_producer_authority' (top) and 'sysiosystem::system_contract::regproducer' (bottom). On the right, a gray rectangular box represents the target function: 'sysiosystem::convert_to_block_signing_authority'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both source functions are converted or mapped to the target function.
