

testing::internal::
JsonUnitTestResultPrinter
::OnTestIterationEnd

testing::internal::
XmlUnitTestResultPrinter
::OnTestIterationEnd

testing::internal::
FilePath::CreateDirectories
Recursively

```
graph LR; A[testing::internal::JsonUnitTestResultPrinter::OnTestIterationEnd] --> C[testing::internal::FilePath::CreateDirectories Recursively]; B[testing::internal::XmlUnitTestResultPrinter::OnTestIterationEnd] --> C; C --> C;
```

The diagram illustrates a call flow. Two source boxes on the left, 'testing::internal::JsonUnitTestResultPrinter::OnTestIterationEnd' and 'testing::internal::XmlUnitTestResultPrinter::OnTestIterationEnd', both have blue arrows pointing to a single target box on the right, 'testing::internal::FilePath::CreateDirectories Recursively'. The target box is shaded gray and features a blue curved arrow pointing from its top-left to its top-right, indicating a self-call or recursive behavior.
