

sysio::chain::controller
_impl::push_scheduled_transaction

sysio::chain::transaction
_context::transaction_context

sysio::chain::controller
::pending_producer_block_id

```
graph LR; A["sysio::chain::controller<br/>_impl::push_scheduled_transaction"] --> C["sysio::chain::controller<br/>::pending_producer_block_id"]; B["sysio::chain::transaction<br/>_context::transaction_context"] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'sysio::chain::controller' followed by '_impl::push_scheduled_transaction' on the next line. The bottom box contains 'sysio::chain::transaction' followed by '_context::transaction_context' on the next line. On the right, there is a gray rectangular box with a black border containing the text 'sysio::chain::controller' followed by '::pending_producer_block_id' on the next line. Two blue arrows point from the right side of the two white boxes to the left side of the gray box. The top arrow originates from the right side of the top white box, and the bottom arrow originates from the right side of the bottom white box.
