

testing::internal::
IsNullMatcher::MatchAndExplain

testing::internal::
NotNullMatcher::MatchAndExplain

testing::internal::
GetRawPointer

```
graph LR; A[testing::internal::IsNullMatcher::MatchAndExplain] --> C[testing::internal::GetRawPointer]; B[testing::internal::NotNullMatcher::MatchAndExplain] --> C;
```

The diagram illustrates a relationship between three methods. On the left, there are two white rectangular boxes. The top box contains the text 'testing::internal::IsNullMatcher::MatchAndExplain'. The bottom box contains the text 'testing::internal::NotNullMatcher::MatchAndExplain'. On the right, there is a gray rectangular box containing the text 'testing::internal::GetRawPointer'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'IsNullMatcher::MatchAndExplain' and 'NotNullMatcher::MatchAndExplain' call or utilize 'GetRawPointer'.
