libff::extended\_mnt6  
\_G2\_projective::print

libff::Fp6\_2over3\_model  
::print

libff::Fp3\_model::print

```
graph LR; A["libff::extended_edwards_G2_projective::print"] --> D["libff::Fp3_model::print"]; B["libff::extended_mnt6_G2_projective::print"] --> D; C["libff::Fp6_2over3_model::print"] --> D;
```

The diagram illustrates a dependency or inheritance relationship. Three source functions, each in a white box with a black border, point via blue arrows to a single target function in a gray box. The source functions are: 1) libff::extended\_edwards\_G2\_projective::print, 2) libff::extended\_mnt6\_G2\_projective::print, and 3) libff::Fp6\_2over3\_model::print. The target function is libff::Fp3\_model::print.
