

BOOST_AUTO_TEST_CASE

BOOST_AUTO_TEST_CASE

validate_set_ua

```
graph LR; A[BOOST_AUTO_TEST_CASE] --> C[validate_set_ua]; B[BOOST_AUTO_TEST_CASE] --> C;
```

The diagram illustrates a flow where two test cases, both labeled 'BOOST_AUTO_TEST_CASE', are directed towards a single function or process labeled 'validate_set_ua'. The test cases are represented by white rectangular boxes with black borders, while the target function is a gray rectangular box with a black border. Two blue arrows originate from the right side of each test case box and point towards the left side of the 'validate_set_ua' box, indicating a directional relationship or data flow.
