

chainbase::index_impl
::commit

```
graph LR; A[chainbase::index_impl::commit] --> B[chainbase::index_impl::revision]
```

A diagram showing a transition from a commit state to a revision state. On the left, a gray rectangular box contains the text 'chainbase::index_impl' on the top line and '::commit' on the bottom line. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'chainbase::index_impl' on the top line and '::revision' on the bottom line. Both boxes have a thin black border.

chainbase::index_impl
::revision
