

XXH64

```
graph LR; A[XXH64] --> B[XXH64_update]; B --> C[XXH64_update_endian];
```

The diagram illustrates a three-step process for XXH64. It begins with a box labeled 'XXH64', followed by an arrow pointing to a box labeled 'XXH64_update', which then points to a final box labeled 'XXH64_update_endian'. The final box is shaded gray, indicating it is the final step in the sequence.
